

Vedant Acharya

AI/ML Engineer

Gandhinagar, Gujarat, India | acharyavedant04@gmail.com | +91-9510039752 | linkedin.com/in/vedant-acharya-71b012374 | github.com/vedantacharya

SUMMARY

Entry-level AI/ML Engineer with hands-on foundations in Python, SQL, and machine learning, built through a structured, self-directed engineering roadmap. Proven ability to independently design, build, and debug end-to-end automation tools, data pipelines, and web applications. Seeking to apply strong analytical thinking and coding discipline in a professional AI/ML engineering role.

SKILLS

Programming & Data: Python (OOP, Exception Handling), SQL, NumPy, Pandas

Machine Learning: Scikit-Learn, XGBoost, Regression, Classification, Clustering, Model Evaluation (Precision, Recall, F1, ROC-AUC, Cross-Validation)

Deep Learning & NLP: PyTorch fundamentals, Neural Networks, CNN, RNN, Transformer concepts

Backend & DevOps: FastAPI, REST API Design, JWT Authentication, Docker, Git, GitHub, Linux

Cloud Platforms: Amazon Web Services (AWS), Google Cloud Platform (GCP), Microsoft Azure

Core Foundations: Data Structures & Algorithms, Linear Algebra, Probability & Statistics, Calculus

PROJECTS

House Price Prediction

- Developed a machine learning-based house price prediction system using XGBoost with an end-to-end pre-processing pipeline for numerical and categorical features.
- Implemented data cleaning, feature engineering, model evaluation (R^2 , MAE, RMSE), and 5-fold cross-validation to optimize model performance.
- Built model persistence and an interactive prediction interface for estimating house prices from property details.
- Tech stack: Python, XGBoost, Scikit-Learn, Pandas, NumPy.

EDUCATION

Diploma in Computer Engineering

2023 – 2026

Shree Swaminarayan Polytechnic, Gandhinagar, Gujarat, India | CGPA: 8.32 / 10

- Relevant coursework: Machine Learning, Python Programming, Data Structures, Statistics for AI/ML, SQL.

Bachelor of Technology in Computer Engineering

2026 – Present

Institute of Advanced Research, Gandhinagar, Gujarat, India | CGPA:

- Relevant coursework: Machine Learning, Python Programming, Data Structures, Statistics for AI/ML, SQL.
